Subject: A Shot At \$82 💰
To: <brian.stephens+99998@oddsjam.com>

Hi Brian,

The NBA and NCAAB seasons are making users insane amounts of profit. This time of the year there are endless opportunities where you can bet on both sides of a game to generate a profit no matter what! This style of betting is known as [arbitrage betting](#) and users are making hundreds, and for some, thousands of dollars a night!

\$23,000 in 22 days (\$1,045/day 💰)

[Click Here To Try Arbitrage Betting](#)

This user is having a massive month and is up more than \$23,000 in 22 days. The [OddsJam Arbitrage Tool](#) notifies users of thousands of profitable betting opportunities daily. Results like these are starting to become the norm for arbitrage bettors and I can't wait to see what this week has in store!

A shot at \$82 💰

There were an insane amount of arbitrage opportunities yesterday, and even more middle bets. [Middle betting](#) is a style of betting where you place bets on BOTH sides of an outcome when there is a difference in lines which could result in winning both bets. This style of betting gets even better when you can lock in an arbitrage (***a profit regardless of the outcome***) along with a middle opportunity. Let's break one down...

The Math:

On Fliff, we bet \$30

On OnyxOdds, we bet \$40

In total, we invested \$70

There are three possible outcomes...

1. **Kyle Kuzma records more than 19.5 PRA's (Points/Rebounds/Assists):** Fliff wins, OnyxOdds loses, we receive a payout of \$75, and a profit of \$5 (\$75 payout - \$70 invested)
2. **Kyle Kuzma records less than 20.5 PRA's (Points/Rebounds/Assists):** OnyxOdds wins, Fliff loses, we

receive a payout of \$77, and a profit of \$7 (\$77 payout - \$70 invested)

3. **Kyle Kuzma records exactly 20 PRA's (Points/Rebounds/Assists):** Fliff wins, OnyxOdds wins, we receive a payout of \$152, and a profit of \$82.

Regardless of the outcome, we're going to walk away with a guaranteed \$5 or \$7, but in the event that Kuzma records exactly 20 PRA's we're going to walk away with a \$82 profit! The [OddsJam Arbitrage Tool](#) identified this situation where we were able to profit \$5 or \$7 or potentially win both for a huge payout!

If you want to take a stab at generating a second income from sportsbetting, click the button below to get a free 7-day trial of the OddsJam Arbitrage Tool:

Hi there,

Winning at sportsbetting has little to do with luck and everything to do with making smart, calculated decisions. The people who profit consistently are not guessing. They bet with an edge and use tools to help identify these edges.

The [OddsJam +EV \(Positive Expected Value\) Tool](#) makes this

process simple. It scans odds from over 200 sportsbooks in real time and displays situations where you have an edge. These differences in odds create profitable betting opportunities.

If you are still placing wagers based on favorite teams, gut feelings, or hot streaks, unfortunately you will be a losing sports bettor. Bettors who consistently win month after month follow the data, stick to proven strategies, and trust the math to guide their decisions. **When using this strategy you can easily scale your bankroll/profits and turn this into an incredible second income!**

I urge you to try this style of betting and click the button below for a 7-day free trial:

[Click Here To Try Positive Expected Value Betting](#)

The value on PrizePicks is insane 🎯

[Click Here To Try Positive Expected Value Betting](#)

PrizePicks set Terance Mann's points scored line to 6.5. Due to the way PrizePicks sets their odds (fixed), we know we're getting this play priced at -119 odds. **The rest of the market believes this play should be priced at -130/-140.** We're getting insane value by taking this play on PrizePicks.

The Sharpest Tool Ever Created... (\$32,000 in 7 days) 💰

This is insane! This user was able to make \$32,000 in under a week from [+EV betting](#). Taking a data-driven approach to sportsbetting will have you doing the same in no time. **You can put this kind of money towards so many things like bills, debt, or maybe even**

the downpayment on a new car. As you grow your bankroll, these profits can be life-changing.

If you like to take a stab at generating a second income with Positive Expected Value Betting click the button below:

[Click Here To Try Positive Expected Value Betting](#)

Best,

Randall

P.S [WATCH](#) how Alex made \$700,000 +EV betting since he started!

To: <brian.stephens+realtest1@oddsjam.com>

Hi Brian,

The weekend is here, and that means **ENDLESS** [Sharp Money Pro Tool](#) opportunities! Use Sharp Money Pro on the go on the OddsJam mobile app! **Secure insane value and be on the sharpest side of every bet with this one-of-a-kind Crossed Market +EV Liquidity Tool.** It shows you exactly where the world's sharpest bettors are putting their money.

The [Sharp Money Pro Plan](#) is normally \$299 per month, but for a **limited time you can get it for just \$149 per month (50% off) when you sign up and use code 50SHARP at checkout!** This is your chance to lock in one of the most profitable betting tools ever built at an unbeatable price. Click [HERE](#) and use code **50SHARP** to secure your exclusive offer now!

[Click Here - Use Code 50SHARP For 50% Off!](#)

If you take the time to read and understand the following breakdown, you will be successful and make money with the Sharp Money Pro tool...

Here is how and why it works:

- There are 2 types of books: **sharp** (aka smart) and **soft** (aka beatable)
- [Novig](#) and [ProphetX](#) are peer to peer betting exchanges and are ***extremely sharp***. Exchanges have market makers, betting syndicates & trading firms setting lines on their platforms. These exchanges have ONLY grown more popular & active...
- These exchanges are extremely sharp when they are highly liquid (have a lot of activity). When this is the case, you want to bet ALL "crossed market bets" (or arbitrage plays) to them.
- By definition, if there's arbitrage (aka risk-free betting opportunity), one SIDE of the arbitrage opportunity HAS to be a profitable (+EV) bet. If you can get BOTH outcomes to ensure a profit, then one SIDE of the arbitrage play is an ***insanely*** profitable wager.
- The insanely profitable side is going to be on the soft (aka beatable) book. You want to bet on this side, commonly MGM, FanDuel, PrizePicks, Underdog Fantasy, DraftKings, Hard Rock, Dabble, when they are "crossed" with NoVig and ProphetX.
- The more "liquid" or active the market is, the higher confidence the bet you are placing is profitable.
- All that YOU have to do is place the bets, which is EXTREMELY easy with "one click bet" that takes you right to it. The Sharp Money Pro tool handles all the hard work for you - you just have to click the "one click bet" button.

This is the time to take your sportsbetting to the next level. For this weekend ONLY we're offering you the [Sharp Money Pro Tool](#) at 50% off when you use code **50SHARP** at checkout!

Best,

Randall

P.S [WATCH](#) Alex explain exactly how this strategy crossed market betting strategy works!

Hi brian,

Learning how to bet should be simple, but it rarely feels that way. You start doing your research, and before long you're buried in Reddit threads that somehow make everything more complicated. Every post seems to argue with the one before it, and it's impossible to know who actually has a clue.

It's not exactly the fastest path to getting better.

That's why tonight's training will break it all down and show you what really works.

[Tonight at 5:00pm](#), you can learn the ins and outs of profitable sportsbetting from the best. He's someone who actually does this for a living and is hosting a free training session that breaks down [arbitrage betting](#) step-by-step. No building out 12 leg parlays. No trusting your gut. ***Just following the advice of someone who has made \$300,000+ since starting.***

[Click Here To Try Arbitrage Betting](#)

Here's the short version of what he'll show you:

Sportsbooks set their odds/lines independently. Because of this,

there are massive discrepancies from one sportsbook to another. You bet both sides of a game, across two different sportsbooks. **When the (+) odds side of a bet are greater than the opposite (-) side of a bet, you have an opportunity to walk away with guaranteed profit.** The best part is, the [OddsJam Arbitrage Tool](#) does all of the heavy lifting and identifies these opportunities for you.

That's [arbitrage](#) betting. It's not gambling, it's data-driven sportsbetting. And once you see how it works, it'll completely change how you think about sportsbetting.

You've tried Reddit. This is better. Click the button below for a completely **FREE 7-day trial** to the tools that have made people a full-time income with part-time hours.

Subject: +EV: NBA Value 💰

To: <brian.stephens+1040@oddsjam.com>

Hi there,

Market inefficiencies between sportsbooks create situations where value is left on the board. These discrepancies lead to profitable betting opportunities. [Positive Expected Value \(+EV\) betting](#) is a data-driven strategy that identifies and takes advantage of this value within the market. It is one of the few proven methods to achieve long-term profitability in sports betting.

There is **MASSIVE** value on PrizePicks 📈

[Click Here To Try +EV Betting](#)

The Toronto Raptors are facing off against the Indiana Pacers and PrizePicks set Jamal Shead's total points line at 10.5. Due to the way PrizePicks sets their odds (fixed), we know we're getting this play at -119 odds. **The [OddsJam Sharp Money Tool](#) identified this play as one being taken by the sharpest bettors/syndicates in the world.** They're looking to be on the same side of this play as us but at worse odds. Which makes this play extremely valuable.

This subscriber is using the OddsJam Platinum plan and made \$25,400 in the month of December. **They recently released a [full-guide](#) on how you can do exactly what they are.** The Football and Basketball seasons are the busiest times of the year to start arbitrage betting. There is no better time to get started than now!

[Click Here To Try The Fantasy Optimizer](#)

Not only are there profitable opportunities on sportsbooks but the DFS (Daily Fantasy Sports) platforms are FILLED with these opportunities. As seen in the photo above PrizePicks is filled with +EV plays. The [OddsJam Fantasy Optimizer](#) displays all of the profitable player prop opportunities available across every DFS platform. The plays in the **GREEN** category are profitable and you can expect to see make profit on these plays in the long-term.

If you have any questions on how to become a profitable sports bettor send me a message. I will personally coach you 1:1 to make sure this happens!

Best,

Randall

Hi Brian,

There were an INSANE amount of profitable betting opportunities yesterday. From [arbitrage](#) bets (*risk-free profit*) to +EV bets (securing massive value), the opportunities were endless. **The user**

below secured a \$69 profit with the chance at much more by placing exactly what the [OddsJam Arbitrage Tool](#) identified. Let me show you how:

[Click Here To Try Arbitrage Betting](#)

This user placed bets on Jalen Williams to score 25 points or more AND less than 26 points.

The process:

On DraftKings, he bet \$139

On Fliff, he bet \$250

In total, he invested \$389

Jalen Williams scores 25 points or less: Fliff wins, DraftKings loses, he receives a payout of \$458, and collects a profit of \$69 (\$458 payout - \$389 investment)

Jalen Williams scores 25 points or more: DraftKings wins, Fliff loses, he receives a payout of \$458, and collects a profit of \$69 (\$458 payout - \$389 investment)

Jalen Williams scores exactly 25 points: DraftKings wins, Fliff wins, he receives a payout of \$916, and collects a profit of \$527 (\$916 payout - \$389 investment)

There is no way that this user was walking away with less than a \$69 profit... completely risk free. Unfortunately, Jalen Williams scored less than 25 point and this subscriber walked away with ****only**** a \$69 profit. The [OddsJam Arbitrage Tool](#) identifies thousands of opportunities similar to this a day. This is the best time of the year to get in on the action!

Hi Brian,

Yesterday, January 11th, I made \$311 arbitrage betting. [Arbitrage](#) betting is a style of betting where you place wagers on both sides of a potential outcome to ensure one of your bets wins (betting on someone to win *and* lose a game, etc).

Making \$311 in a day is INSANE when you think about it: Over the course of the year, that is \$113,515 (365 x \$311). The point I want to make with this email is not to brag, but rather let you know what is possible as a disciplined and hard working arbitrage bettor.

I'll usually spend around 15 minutes a day arbitrage betting and knock down around \$50 in profit. To me, this is a phenomenal use of time - **that's \$1,500 a month in my pocket for only 15 minutes of work a day.**

[Click Here To Try Arbitrage Betting](#)

6-Figure Income 

This OddsJam Platinum plan subscriber has made over \$100,000 in the past 12 months as a side hustle. The [OddsJam Arbitrage Tool](#) allows you to **guarantee yourself a profit with every pair of bets you place**. Making this type of money is insane and makes you wonder why everyone isn't doing this!

Debron made \$1.9k last night using the OddsJam Sharp Money plan all from his phone. Think about what an extra \$1,900 could do for you. [Profitable betting](#) could pay for your mortgage, car payment, and student loans. This is a substantial amount of money that you can make on your free time from home!

Hitting arbitrage bets really does feel like you are grabbing from a money tree. It's something I would like you to experience.

If you want to try placing bets on both sides of an outcome to secure a profit regardless of the outcome, and create a substantial monthly income, click the button below:

Hi Brian,

Below are some of the insane profits users have achieved with the OddsJam Arbitrage Tool. With College Football, College Basketball, NFL, and NBA seasons in full swing there are thousands of opportunities a day. [Arbitrage betting](#) is the process of placing equal and opposite bets on the same game to generate a profit regardless of the outcome. Because of the differences in odds across several sportsbooks, you can walk away with a profit no matter the result of the game!

The [OddsJam Arbitrage Tool](#) has helped thousands of people make thousands of dollars. It does this by identifying situations where you can place a bet on both sides of an outcome to generate a profit no matter what (betting on a team to win AND lose a game, etc).

The **SHARPEST** Tool Around (\$7,900+ profit)

[Click Here To Try Sharp Money](#)

This subscriber is using the [OddsJam Sharp Money Tool](#) which allows him to constantly bet with a massive edge. **He made more than \$7,900 in just 30 minutes of betting all from his phone.** If you want to make a full month salary from your phone or computer then click [HERE](#) for a 7-day free trial!

Free Arbitrage Training 

This OddsJam subscriber is showing you how he made over \$100,000 in 2025 by using strategies like arbitrage betting which allowed him to make a risk-free profit while betting. **Each arbitrage bet takes about 60 seconds to place, meaning this side hustle can yield you \$600+ an hour.** The best part is you can do this on the go while you do chores like food shopping, bringing the kids to school, or going to get gas.

The [OddsJam +EV Tool](#) identifies opportunities where one side of the market is out of sync from the rest, creating value for you to make profitable bets.

The [OddsJam Arbitrage Tool](#) identifies opportunities where both sides of a market are out of sync from the rest, creating a situation where you can generate a profit regardless of the outcome of an event.

If you would like to use the [OddsJam Arbitrage Tool](#) to make a life changing amount of money in January, click below to start your 7-day free trial:
